

IPACS e-Solutions (S) Pte Ltd

PRESS RELEASE:

Launching of IPACS Advanced Logistics System at SCM Logistics World 2005.

SINGAPORE: WEDNESDAY, SEPTEMBER 7, 2005

IPACS Advanced Logistics System (ALS), developed by IPACS - Singapore's leading logistics IT Solutions Provider, was officially launched in Singapore today at SCM Logistics World 2005 exhibition, 7 – 8 September 2005 at Suntec City Convention Center..

Advanced Logistics System (ALS) is IPACS' latest state-of-the-art web-based business solution designed for Supply Chain Execution. Tailored for today's multi-modal transport and third party logistics industry, the sophisticated ALS is designed to enhance visibility and collaboration, boost business efficiency and productivity, lower cost and improve customer service.

With Airfreight, Seafreight and Roadfreight and e-logistics Portal Services and when incorporated with Warehouse Management System (WMS) and Transport Management System (TMS), ALS presents a full suite of seamless operational capabilities. In addition, ALS' tight integration with Oracle E-Business Suite brings tremendous benefits to existing and new LSP customers who are looking for a sophisticated logistics application with proven financial modules and complete backend solutions. It also provides standard APIs to other third party systems. Additionally, the interface with Cargo Communities, Carrier Portals, Governmental Customs Authorities and other XML connectors facilitates a more seamless business to business collaboration.

Mr Wong Sing Lam, CEO/Chairman, IPACS Group of companies said, "IPACS has always been a strong player in the Transport & Logistics industry in particular in the Asia Pacific. In this competitive, cross border world, we are a trusted name. Our position as a leading logistics IT Solution Provider gives us the chance to bring our expertise in the industry to a higher plane – that of an integrated web-based advanced logistics system.

With IPACS ALS – we want to enable Logistics Service Providers (LSPS) to face their greater customer commitments and rising expectations to offer faster, better, global service at a lower cost. In meeting these challenges, LSPs are coping with the needs to streamline and automate processes, enhance visibility, enable online KPI measurement, improve collaboration among carriers, trade and logistics partners, and integrate planning, control and execution."

IPACS ALS is developed on an open-platform 3-tier component based architecture; adopting the leading edge Internet and Java/J2EE technology, built with strategic support from our technology partners, such as IBM, Oracle and Sun. ALS is highly scalable, resourceful, robust and secure, meeting the needs and pace of today's challenging global organizations especially those with extensive global networks and operations.

###

About IPACS:

IPACS Asia Pte Ltd

Established in 1983, IPACS was founded in Singapore with a vision to provide superior IT solutions to the transport and logistics industry. Today, IPACS has since grown to become a leading IT/E-Commerce solutions provider, with key competency in Transportation and Logistics, Banking and Finance, Aviation and Airport, Distribution and Manufacturing, Telecommunications and Utilities industries.

IPACS comprehensive range of solutions includes developing and marketing industrial applications, hardware distribution, network and communication systems integration, professional and training services.
