

Jetsea Logistics Remains Competitive with Kewill Forwarding

Leveraging On Kewill Forwarding On-Demand's Capabilities and Convenience

Jetsea Logistics (S) Pte Ltd, formerly known as EAS International Transportation (S'pore) Pte Ltd, a Singapore based one-stop logistics service provider since 1994, has upgraded their technology capabilities to Kewill Forwarding On-Demand ("KFF On-Demand"), an integrated global freight forwarding solution designed for logistics service providers that is hosted over the Web.

Jetsea Logistics, a strong supporter of IPACS over the past ten years, will be phasing out IPACS second generation of Freight Management System, iCMS to make way for the latest state-of-art solution developed by Kewill-IPACS – KFF On-Demand with effect from 1 July 2008 onwards.

The new solution, KFF On-Demand, will enable Jetsea to rationalize international services by air, sea and road, worldwide. This will enable the company to enhance collaboration between customers, agents and carriers, minimise transaction costs, shrink delivery schedules and improve visibility and control of goods throughout the entire export and import process using a fully integrated system. All of these available over the web, KFF On-Demand is a hosted service so that logistics service has the convenience of working at any time and from any location that has internet connection with round-the-clock support.

"At Jetsea, we recognize the fact that freight forwarding is no longer simply the transportation of goods. Customers are now on the 'hunt' for a service provider who is able to assist in managing their global shipping needs by providing timely information, diversified options and cost effective solutions," said Jasmine Ang, Accounts Manager of Jetsea. "By making a switchover to KFF On-Demand, we address the need to have an integrated network platform and provide continual value-added service to our customers through a cost effective solution with hassle-free maintenance"

"Through the successful implementation of KFF On-Demand at Jetsea, Kewill-IPACS has demonstrated the agility and flexibility of our solution to address challenges faced by logistics service providers of all strengths and sizes, in the Asia region," said Julie Lim, Director of Sales and Marketing at Kewill-IPACS.

About Jetsea Logistics (S) Pte Ltd

Jetsea Logistics (S) Pte Ltd is a Singapore based total logistics solution provider since 1994. Primarily engaged in the business of international freight forwarding, Jetsea's business model has evolved to reflect changing mindsets and developments in the transportation industry. From simple pick and pack services to the provision of information management tools to track shipments, Jetsea has an extensive worldwide agency network as a member of the World Cargo Alliance (WCA) and Security Cargo Network (SCN).
